About Us

TLBS Corporation

We are a company “General Contractor”, for Engineering, consulting and development projects, specialized in Reliability, Maintenance, Engineering Services for all kind’s assets and facilities. We use artificial intelligence and the Internet of Things through intelligent systems, we manage powerful technological tools to offer integral solutions from enterprise resource planning “ERP” to enterprise asset management “EAM”.

We propose to reduce costs without reducing the quality of our services and products, we help our clients to control budgets as a wholesale supplier of spare, parts, consumables, materials, equipment and commercial and industrial machinery.
We were born in 2016 in the United States of America to meet the demand of the markets, to support our customers in their needs. We assist in complex operational problems by applying our complementary technologies in contribution to automation and digitization for processes and facilities.

Our culture is based on Win-Win; we move our specialties under the principle: Know - Make and provide high-performance practical solutions by being an agile, flexible agent that perceives your environment by carrying out actions to maximize the chances of success. We help meet the objectives of our clients as a supplier of goods and services for the sectors: Residential, Commercial, and Industrial.

Vision

We want to be the service company most focused on enterprises asset management for all kin of facilities and offer integrated engineering, technology and product solutions. Our greatest challenge is to accompany our clients in their needs and contingencies for production processes, operations, logistics, supplies, maintenance and special projects.

¿What do we do?

We offer comprehensive service solutions for:

Reduce

* Non-productive times
* ~~Planned obsolescence~~
* Costs without decreasing quality
* Unscheduled events
* Generalized risk
* Accidents and incidents

To protect

* Health and life of people
* Facilities & extend the usefullife of assets
* Surfaces, ecosystems, environment

Control

* Expenses and Budgets
* Processes and operational problems
* Industrial deviations and fatalities

¿ What we offer?

* Spare parts, materials and consumables.
* Commercial and industrial equipment and machinery.

We are a Wholesale Supplier & Distributor

We accompany our clients in contingencies and intervene in the development of their remediation, plant stop, recovery, rehabilitation and reconditioning of facilities

¿How do we do it?

* We use Powerful Software tools for RME and EAM
* Technology (IA - IoT) to automate and digitize.

Turn-key Projects:

We take care of 100% of the maintenance, engineering and general services management for your facilities.

E-SM Industrial

Facilities Hard Services

Industrial Projects and Assemblies, Engineering of Industrial Fields and Plants

- EPCI projects. Engineering procurement and construction and installation
- Pre-commission, commission, start-up of surface facilities.

Energy & Environment Services

- Integral engineering solutions and consulting for oil, gas, water and save energy projects
  - Produced Water of Oil & Gas
  - Flowback Gas: Burn & Vent Control and recovery
  - Outflow Gas: Capture and & Sealing Leaks
  - Energy Saving Projects

Industrial Maintenance Services

- Operational maintenance services production assistance
- Reliability engineering, maintenance and technology for physical asset management and industrial facilities
- Inspection and maintenance control
- Maintenance rotary and static equipments

This Industrial division serves the areas of engineering, consulting, EPCI projects, industrial assemblies, asset maintenance management in technical and industrial areas for more complex facilities such as: Refineries, industrial plants, exploitation of deposits in oilfields and mines, production lines of packaging, industrial packing plants, equipment manufacturing, processing plants and water treatment.

Turn-key Maintenance Projects

We take care of 100% of your operational maintenance management, with comprehensive artificial intelligence tools (CMMS / EAM) as part of our technology (IoT) Internet of Things with world-class best practice applications. Our clients can review our management in real time on their mobile devices, fully in the cloud and available anywhere they are connected.

IADC SPE SMRP ANAB IQNet

Logistics & Fleet Services

U-RIDES.It is a logistics support division created to establish the link and dispatch -delivery relationship. We provide support services to logistics processes for asset transfers, transportation and distribution.

We accompany our clients in the logistics process of light merchandise from the use of electronic operations driven by events directed by the consumer through artificial intelligence, guaranteeing effective delivery to the consumer until the destination.

U-RIDES Services are also oriented to the maintenance and control of transport fleet real-time for leading companies in mass consumption, supply chain, e-commerce, cities, mail, and courier services, parcels, among others.

amazon GRUBHUB™ *and others*

Wholesale Supplier & Distributor

We are a wholesale supplier, propose integral solutions for all types of facilities and for development of oilfields, from the union of manufacturers we offer materials, parts, spare parts, consumables, commercial and industrial equipment and machinery with high-quality standards such as :

ANSI ISO 9001:2015 ASTM ASME API

TLBS Corporation
